

FOR IMMEDIATE RELEASE:

International Test Solutions Announces Asia Branch Office

Reno, Nevada based, semiconductor test materials manufacturing company, International Test Solutions (ITS) announced official plans to expand its worldwide customer service and applications engineering support network with a branch office in Zhubei City, Taiwan.

Reno, Nevada – February 4, 2008 – The new branch office will bolster International Test Solution's comprehensive customer service and technical support infrastructure in Asia, which currently includes a distributor network in Taiwan, China, Japan, Korea, and Malaysia.

"Opening this branch office strengthens our commitment to becoming more local and accessible to our customers in Asia," said International Test Solutions President, Gene Humphrey. Mr. Humphrey added, "The new office will guarantee the highest level of technical and applications support for our existing and future customers in Taiwan and mainland China."

The new branch office is located at 7F.-8, No.9, Zhuangjing 6th St., Zhubei City, Hsinchu County 30264, Taiwan (R.O.C).

About International Test Solutions, Inc. (ITS)

International Test Solutions provides non-destructive probe card cleaning products used by semiconductor manufacturers to remove debris and contaminants generated during wafer level and burn-in/test socket testing. By removing loose debris and adherent contaminants in-line, the quality of the testing data is improved, the test equipment downtime is reduced, throughput is increased and manufacturing yields are improved.
